

Automatic Drum Clamps

Single Drum Clamp

2 Drum Clamp

- For stacking and transporting 210 litre steel drums
- Fully automatic operation. The fork lift operator drives the attachment towards the drum. The drum attachments arms are then raised and fall and locate under the rolling hoops of the drum. The drum can then be safely raised and transported. The drum is released by lowering the drum to the ground and backing the fork lift truck away
- The heavier the drum, the tighter the grip
- Available as single or double drum lifting units
